It has been gathered from reliable sources that a group of individuals based in India are operating a sophisticated cyber-enabled fraud scheme, primarily from Delhi and few other locations, targeting victims in Japan. The perpetrators are engaging in technical support scams by displaying fake virus alerts and phishing prompts on the computer screens of unsuspecting users. These pop-ups, which are hosted on malicious URLs (primarily using Microsoft Azure servers), induce fear by falsely claiming that the victims' systems are infected and instructing them to call a specified phone number. Once contact is established, the operatives—impersonating representatives from legitimate entities like Microsoft or Apple—convince the victims to install remote access tools, thereby gaining control over their computers and sensitive financial information and defraud them.

Four specific instances of cheating of Japanese citizens have been gathered from the source as following:

1. Around April 17–18, 2024, pop-up warnings appeared on the computer of Mr. Sakai Takaharu, aged 57, a resident of Kosone-cho, Nishinomiya-shi, Hyogo Prefecture, Japan, while he was browsing a website. The alert messages displayed on his screen included alarming statements such as Your computer has been infected with a virus and Please call 01012019088006 immediately. These messages created fear and anxiety in Mr. Takaharu's mind, prompting him to seek assistance. In response, Mr. Takaharu called the number provided, and subsequently received a callback from a suspect using the number +6562297777. The caller falsely claimed to offer technical support. He assured Mr. Takaharu that he would remove the virus from his computer and claimed that the money in his bank account needed to be transferred to a safe bank account for security reasons. The suspect persuaded Mr. Takaharu to install remote-control software on the pretext that it was necessary for providing technical support. He introduced himself as a Microsoft director and further misled Mr. Takaharu by claiming that his computer was infected with Trojan malware, that his bank account was unsafe, and that urgent action was needed to protect his funds. Following the suspect's instructions, Mr. Takaharu showed his Internet banking account's PIN

number and proof of identity to the laptop camera. Then, a bank account was opened at the SBI Sumishin Net Bank, Ltd. in Takaharu's name and the balance in his bank account was transferred via remote control to the newly opened account. A total of 20,958,783 yen (approximately 144,130.54 USD) were transferred. Then the suspect purchased 2.10646958 BTC in Mr. Takaharu's Binance A/C which were transferred to following cryptocurrency accounts:

a) Binance account (Account managed by the cryptocurrency exchange)

Sent date/time: 2024/4/17 9:38 (UTC)

Sent amount: 0.09896656BTC

Receiving account: Binance User ID: 185856612

b) Private address (Address not managed by the cryptocurrency exchange)

Sent date/time: 2024/4/17 10:21 (UTC)

Sent amount: 0.98142191BTC

Receiving address: bc1qjky5qyxlds6mgdqm3sd7mplnezentjf0d2e4hg

3) Private address (Address not managed by the cryptocurrency exchange)

Sent date/time: 2024/4/18 2:39 (UTC)

Sent amount: 0.63930773BTC

Receiving address: bc1qjky5qyxlds6mgdqm3sd7mplnezentjf0d2e4hg

The proceeds were further transferred to Binance wallet address 16xvkDN1G7eHBDfBGSXEQrdnzBK6NpH154. This wallet in addition to one mentioned at Sr. 1 above, belongs to one Kapil Gakhar, r/o B641, Ansal Sushant City, Panipat, Haryana, Aadhaar No. 6073 9084 0174, mobile no. +919802190280. The BTC has been converted to USDT and has been transferred to other cryptocurrency exchanges on multiple occasions. Further, the part of BTC was found to have been converted into the Indian fiat currency i.e. Rupees.

2. Between May 2 and May 3, 2024, the suspect/suspects caused an alert message on the computer of victim Koji Suzuki, Address Toshima-ku, (Age 72) Tokyo Phone number: 090-6312-8403 that prompted "Infected with virus" and a contact telephone number was displayed on the victim's computer with loud warning sound. When the victim called the telephone number, the suspect impersonating an employee of Microsoft instructed the victim to buy Apple Gift Cards worth JPY 210,000 in total as the cost of removing computer virus and asked the victim to show the codes of the gift cards to the camera of his computer, and thereby defrauded the victim of the right to use the gift cards. Codes of the gift cards are: X54F5RDP2DH53WL2, XRL36KHTR6242Y9Q, XKDQ62PKMGVM5QD2, XQ89D392RGYRCL8W.

3. On May 6, 2024, the suspect/suspects caused an alert message to be flashed on the computer of victim Masashi Matsui (Age 65), Address Edogawa-ku, Tokyo Phone number: 080-3341-3089 prompting an alert and a contact telephone number, with loud warning sound. When the victim called the telephone number 010 1(888)3654340, the suspect impersonating an employee of Microsoft instructed the victim to buy Apple Gift Cards worth JPY 40,000 in total as the cost of removing computer virus. Suspect obtained the codes of the gift card from victim, and thereby defrauded the victim of the right to use the gift card. Code of the gift card is: X54F5RDP2DH53WL2.

4. On July 28, 2024, a suspect or suspects targeted Mr. Sherpa Norsang, a 32-year-old resident of Shinagawa-ku, Tokyo, with phone number 070-1390-2027. The suspect(s) caused a fake alert message stating "Infected with virus" and a contact number, 0101-5098164543, to be displayed on the victim's computer screen. When Mr. Norsang called the number, he was connected to an individual impersonating an Apple Support employee. The impersonator falsely claimed that a technical issue could be resolved for a fee and instructed the victim to purchase Apple Gift Cards totaling JPY 80,000. After the victim complied, the suspect obtained the gift card codes—XYH453FXZYTNP94G and XLRV58YR8567M86—and thereby fraudulently acquired the right to use the gift cards.

Further, according to the source, the Japanese language used by the callers are notably unnatural and non-fluent. Additionally, background conversations in Hindi were audible during calls, and incoming calls from the fraudsters showed Indian country codes, suggesting that the operations were conducted from India. Source based on analysis of Malicious URL's used in Fraudulent Pop-ups, and the IP addresses used to subscribe to hosting platforms informed that they trace to India.
