Source has informed of a transnational cyber fraud network involved in the dissemination of fraudulent pop-up messages that impersonate legitimate technical support services, those of reputed companies like Microsoft and Apple for targeting and cheating US and EU based victims. Source has further informed that operation of the fraud network is primarily coordinated and run through call centres located in Delhi, India, while financial transactions are processed through entities located in Spain and France but controlled by Delhi based perpetrators. The perpetrators, operating under the guise of providing technical assistance, gain remote access to victims' computers and charge fees for non-existent or malicious services, resulting in financial losses and compromised data security. The network is supported by multiple shell companies registered in Delhi and other places in India and some in Europe. Following victim's testimonies have been gathered from source:

Victim #1:

Source informed that [REDACTED], in or around April 2020, while experiencing technical issues with his Lenovo laptop and printer, received a pop-up message stating that his computer was shutting down. Acting on the instructions, he contacted a support number believed to be linked to QNEXPERT. The suspect resolved the technical issue and persuaded BORNEO to purchase a support plan for approximately USD 699 using his credit card. On or about 11 May 2021, BORNEO was contacted by an unknown female suspect claiming QNEXPERT was shutting down and he would be issued a refund. He was subsequently contacted by an individual identifying himself as "Christian DAVIS" from phone number (310) 219-6682, who claimed to have refunded USD 2,000 but mistakenly deposited USD 20,000 into BORNEO's bank account. Under this false pretence, DAVIS instructed BORNEO to withdraw USD 18,000 from his Sharon & Crescent United Credit Union (SCU) account and ship it via UPS to a person named Sheryl WILLIAMSON at 658 Reynosa Court, Berea, Ohio. On 12 May 2021, BORNEO was again contacted by DAVIS and falsely informed of another mistaken refund of USD 20,000. Acting on DAVIS's instructions, BORNEO withdrew an additional USD 17,000 and shipped it in a similar manner to the same address. DAVIS also directed BORNEO to change his phone number from (508) 269-9079 to (774) 240-4886. Later, BORNEO discovered that both "refunds" had been internal transfers between his own SCU accounts (ending in 0345 and 0040) and that he had not received any actual funds from QNEXPERT. Attempts to recover the cash shipments from UPS failed as the delivery address was found to be vacant. On 13 May 2021, DAVIS contacted BORNEO again, but the victim, having realized the scam, demanded his money back. DAVIS promised to send a cheque, which was never received. BORNEO subsequently changed his phone number again to (508) 345-8555 and updated his bank account numbers.

Victim #2:

Source informed that [REDACTED] was contacted around 28 Feb 2021 by RNFIX, who offered to repair his non-functional computer for a fee of USD 599. IBRAHIM paid the said amount and was provided with a company address in Virginia Beach, ZIP code 23452, and the phone number 1-888-251-7224. On 15 April 2021, he began receiving scam-labeled phone calls, and by 24 April 2021, calls from multiple numbers including 441-9509-77733, 1-310-219-6682, and 1-707-809-9441 were received. The suspects falsely

claimed that RNFIX had made an error during the prior repair and owed him a refund of USD 500. They gained access to his computer and manipulated the screen to show a false deposit of USD 50,000 into his account and then convinced IBRAHIM to wire back USD 45,500, claiming it was the excess amount mistakenly deposited. Believing the representation, IBRAHIM proceeded to the bank and initiated a wire transfer. Upon returning home, the suspects instructed him to avoid using his phone, computer, or visiting the bank for two hours. Sensing something was wrong, IBRAHIM returned to the bank and discovered that the suspects had transferred USD 50,000 from his own savings account into his checking account to fabricate the appearance of a refund. He immediately requested his bank to stop the wire transfer. The bank initiated a cancellation process but warned of no guarantee due to the passage of time. IBRAHIM also filed a local police report numbered 21-1160. The suspects continued attempting to contact him through various numbers including 1-877-242-7372 and 1-424-237-1951, unaware that he had reported them. IBRAHIM confirmed to the police authorities in US, that the telephone number 441-9509-77733 mentioned in his complaint had too many digits and could not recall its exact details.

In respect of Victim #1- #2 source has informed that, the telephone number 310-219-6682 which was used to contact the victims #1 and #2, was linked to the IP address 103.87.141.99, which is registered to Alliance Broadband Services Pvt. Ltd., located in Kolkata, West Bengal, India. The details of the account associated with the phone number is : username ganja2284 and the email address ganja2284@gmail.com. Records indicate that the phone number was in use from 22 January 2021 at 14:49:46 UTC until 2 September 2023 at 12:19:26 UTC. Two Android device identifiers were associated with this number during the mentioned period: 49de280d7191f688 and 2812d097-0342-4a4a-8d49-3698fb4bd1d4.

Victim #3:

Source informed that [REDACTED], suffered a monetary loss of \$4,498 falling prey to a tech support scam. On or about 9 April 2024, TOM received a voicemail on his home phone number (724-438-0352) from a person identifying himself as Raymond CASTLE, claiming to be a Senior Technical Manager from "ABSOLUTE SOFTWARES," who cited a security problem with their computer. CASTLE left two toll-free callback numbers: (800) 981-6836 and (800) 299-4062. TOM had previously purchased antivirus programs (Driver Updater, WinAV + Ransomware Defender, and Cleverbridge) in 2017 but did not renew them, leading him to speculate that "ABSOLUTE SOFTWARES" could be a renamed version of one of those. On 10 April 2024, TOM and DEBBIE called the given numbers, on speakerphone which was answered by a male suspect with an Indian accent identifying as CASTLE, who referenced job ID # FX8800. CASTLE claimed TOM and DEBBIE owed \$40,000 for IP address protection services provided over seven years. He instructed them to run commands on their computer, gaining remote access and displaying fabricated "outstanding invoices." Despite disputing the charges, the suspects pressured TOM and DEBBIE into agreeing to pay \$4,498 via two checks: one for \$3,499 dated 10 April 2024, and another for \$999 dated 15 April 2024, both payable to ABSOLUTE SOFTWARES. Suspect, CASTLE instructed DEBBIE to scan and send the checks and for claiming credibility, placed two documents on the desktop computer of victims, purporting to be "client and technical reports". DEBBIE took photos of the payment instructions and documents, and TOM provided screenshots from his PNC Bank account showing both checks were processed. This entire interaction with CASTLE occurred on 10 April 2024.

The suspected again contacted [REDACTED] on 15 November 2024, by suspect introducing him as WAYNE and identifying himself as a representative from the same security service provider, Thomas. He referenced the couple's previous cancellation of firewall and computer protection services in April and claimed they had cleared outstanding bills using their PNC checking account ending in 57. WAYNE warned that if they did not call back to finalize the cancellation with a "final confirmation letter," the closure would be denied and the services would be reactivated. He asked them to contact him as soon as possible at his "closure department" toll-free number, 1-800-574-9640, and to ask for "Jack." DEBBIE and TOM called back and spoke with WAYNE (employee ID: MXBJ7786), who transferred them to "John MILLS" (ID: MXMXBJ078), who claimed an additional \$80,000 was owed to Absolute Software. MILLS instructed them to install Zoom, ran another remote session displaying fabricated invoices, and transferred the call to some other suspect Gary WILLIAMS (job ID: FX8801, contact: 800-574-9640), who claimed to be Senior Technical Manager and convinced them to settle the balance for three reduced credit card payments. DEBBIE, under pressure, provided her PNC Bank credit card details via Zoom Chat and made three payments: \$1,196 and \$1,197 to LINCO DIGITAL (Spain) and \$798.79 to SOLUTIONS 4U NOW (Canada) on 15 Nov 2024. DEBBIE provided their PNC Bank Credit Card Number, Expiration Date and Security Code to suspect Williams. Shortly afterwards William inform that transactions were declined, and upon his direction, DEBBIE called PNC Bank for authorization of each declined transaction. Upon being instructed by WILLIAMS, TOM sent an email from his email id tand@atlanticbb.net confirming satisfaction with the computer services and requested to accept his payments. The call was transferred back to WAYNE who provided a secret code "FVM56TJF2D" for future verification. They later (on 15 Nov 2024) received a call from (724) 438-4528, which was answered by TOM, and the caller was again MILLS. The suspect operated via several phone numbers: (800) 981-6836, (800) 299-4062, (800) 574-9640, (800) 574-7165, and (724) 438-4528. DEBBIE believed MILLS and WILLIAMS may have been the same person and noted call center background noise during interactions. DEBBIE also recalled all three suspect callers had Indian accents. On 16 November 2024, DEBBIE contacted PNC Bank, which confirmed the transactions were fraudulent and successfully reversed them on 19 November 2024. DEBBIE filed two IC3 complaints (due to technical issues during the first) and contacted the National Elder Fraud Hotline. While the credit card transactions were reversed, the \$4,498 paid via checks was not recovered. DEBBIE and TOM, both retirees living on fixed income, reported the loss as significant.

Victim #4:

Source informed that on 16th January 2017, [REDACTED] countered a pop-up message on her personal laptop stating: "Do not close, ring this number." With no access to alternative technical assistance, she called the number, which she is now unable to recall. The call was answered by a male suspect with an American accent who claimed that her laptop had been hacked. He identified himself as a representative of Techzone Solutions and stated that immediate technical servicing was necessary. The suspect quoted a fee of £600-£700 to resolve the issue, which Ms. Maplethorpe stated she could not afford. He subsequently gained remote access to her laptop and offered to resolve the matter for a reduced fee of \$799.99 USD. She agreed, made the payment, and received confirmation via email from customerservice@gpndata.com, as well as a signed document from documents@rightsignature.com. She also confirmed her acceptance of the payment terms in an email to support@techzoneusa.net. On 16th July 2019, she was contacted by a female suspect with an Asian accent (Indian or Pakistani), who claimed to be from MacMakers IT Services. The suspect informed her that the business had changed names and that Ms. Maplethorpe held an active subscription requiring payment. Ms. Maplethorpe denied knowledge of any such subscription. Under persistent deception, she permitted remote access to her device and was charged £1,499.00 GBP. Confirmation was sent from info@outtasking.io and an official receipt followed from

tpvirtual@redsys.es. She later signed blank documents sent from dse-na3@docusign.net and info@seureshop.com.es, under the impression that these were required to terminate the subscription. On 17th July 2019, the same entity contacted her again and demanded a further payment of £1,498.98 GBP. The supporting emails and documents were nearly identical to those used previously. Further, on 4th July 2022, Ms. Maplethorpe received another call, this time from one "LIV Connect", again employing the same deceptive narrative of a continuing service contract. She was informed that a payment of £1,999.99 GBP was required. The caller guided her through setting up a PayPal account to facilitate the transaction, which she completed in two parts. The first payment was made under the name LIV Connect, and the second, on 7th July 2022, was requested by an entity identified as TECH LIVE. These two transactions were the only activities recorded on her PayPal account. Furthermore on 14th March 2023, she was again contacted, this time by Absolute Software, using a nearly identical script and asserting that another payment was due. Ms. Maplethorpe paid £1,494.25 GBP and received documents from info@secure-payments.eu to sign. She explicitly expressed her desire to terminate all dealings, and believed the process was completed after receiving an unsigned webpage confirmation stating that all services had been cancelled. This was further affirmed by a follow-up email from Absolute Software. However, in August 2023, Ms. Maplethorpe was contacted again, this time by Absolute Solutions, who alleged that she had failed to uninstall their software. Though unaware of any such requirement, she once more permitted remote access. The caller claimed to have removed the so-called "service line," from her system and demanded payment. Distressed by the situation, she refused further payment and terminated the call. On 16th February 2024, she received an email from notifications@zohoassist.com stating her subscription with Web Secure Global had been renewed at a cost of \$499.00. This was followed on 12th July 2024 by a duplicate invoice from billing@blue-tech.shop, demanding £1,499.99 GBP and listing the contact number +44 0161 818 7185. She researched and found that this number was associated with numerous scam reports. Subsequently, on 16th July 2024, she received a nearly identical demand from billing@absolutesservicee.xyz. On 18th July 2024, another threatening email followed from daisy@eprotectservice.org, and a final escalation email dated 8th August 2024 warned of legal action if the outstanding balance remained unpaid. Final Contact - August 2024. On 23rd August 2024, Ms. Maplethorpe received an email from a Diana Hams, who identified herself as the Business Operations Manager for Web Secure Shop, using the address diana@absolute-softwareaccount.com. She was given seven days to settle her account or face recovery procedures. A phone number 01245 790228, was provided for further communication and was also flagged in multiple scam alerts. Later that day, she received a phone call from a man who introduced himself as John Miles of Web Security Global. He had an Asian accent and mistakenly addressed her as "Christine." Sensing another fraud attempt, Ms. Maplethorpe pretended to cooperate and was transferred to a second male named Simon, who claimed affiliation with Work Live Solutions. The caller repeated known scam scripts and divulged the personal details of another victim—Christine Lloyd, aged 38, of Markswood Port. Payment demands ranged from £1,800 to £2,000. The call originated from 07976 425471.

Over the years, suspect contacts included individuals named Bob (using numbers 07837 689635, 07941 738569, and 07941 732536), Raymond (01724 852101), and Steve (07941 987654), all of whom were linked to suspicious activities. From the initial fraudulent pop-up in 2017 to the last scam attempt in August 2024, Ms. Maplethorpe endured deception, impersonation, cheating and extortion, suffering an estimated cumulative loss of £9,000.

Victim #5

Source informed that on 26th August 2024, [REDACTED] was checking his email when he received a message purporting to be from one Colissimo. Upon clicking a link contained in the email, a pop-up window appeared on his computer screen. The window displayed a warning indicating [REDACTED] Trojan Horse virus and advised him to immediately contact Microsoft Technical Support for assistance. Accordingly, he placed a call to the telephone number provided (although the victim cannot now confirm whether this is the same number mentioned on the invoice later received). The call was answered by an individual suspect identifying herself as a representative of Microsoft's technical support team. The suspect then instructed the victim to modify certain system settings, after which she took remote control of the victim's computer. The suspect proceeded to display alleged signs of virus infection and warned the victim of potential risks. She assured the victim that she would take corrective action prior to the completion of the alleged malware download. Subsequently, the suspect offered the victim a "protection package" to prevent any further harm to the system. The offer was presented with urgency, and the victim was not given adequate time to consider the proposal. Under pressure, the victim was persuaded to make a payment of €342 via an online interface using a credit card. Following the transaction, the victim received an invoice bearing the letterhead of a company named ENDIVITRAS. This name also appears in the victim's bank statement dated 27/08/2024, corresponding to the transaction amount. As the payment was processed online, the victim does not have specific details of the recipient bank account.

Victim #6

Source informed that on 30th July 2024 at 11:59 hours, [REDACTED], was browsing an Olympic Games website when several pop-up windows appeared on his computer screen, including one with a red background and a high-pitched audio alert warning him not to shut down the computer and to immediately contact a technical support number - 09 70 38 98 24 - with Microsoft logos displayed, giving an impression of legitimacy. Upon calling the number, the victim spoke to an individual identifying himself as Gary AZER, who claimed to be a Microsoft engineer. The suspect instructed the victim to download a software named Adblock, claimed that 1,471 infected files were present on the system, and proposed the installation of three protective software tools for €369. The victim agreed, and payment was made by bank transfer, authorised via the victim's digital security key. The suspect then claimed to detect a suspicious €500 subscription linked to an Orange Money operator card (ending in 497) and urged the victim to block it, which again resulted in the victim authorising another transfer of €500 under the impression of security verification. During the interaction, the victim received a technical activity report and a general service agreement from a Spanish company, 24 Global IT Solutions SL, sent via DocuSign, which he signed without reading due to the urgency created by the suspect. Later the same day, at 14:41 hours, the victim called the same number again and was attended to by another individual identifying himself as Pascal ROBIN (ID No. 053), who claimed to be a Microsoft engineer based in Nantes and spoke with a North African accent. This second suspect took remote control of the victim's computer via ConnectWiseControl software and claimed to have detected two blocked transactions from China, one for €500 and another for €199, allegedly intercepted by the bank and not debited. This session lasted over an hour. In total, the victim was debited €869 (€369 + €500).

Victim #7

Source informed that on 3rd July 2024, the victim, [REDACTED], received a suspicious email while checking his inbox and clicked on a link contained therein, which triggered a loud and alarming pop-up window on his

computer, allegedly from Microsoft, displaying logos and warning that his system was infected with viruses. The alert advised him to urgently contact the number 09 70 18 40 88. Upon calling, he was answered by a male individual who introduced himself as Samy BARRAT, claiming to be from Microsoft Technical Support. The suspect warned that the victim's bank accounts were at imminent risk and convinced him to grant remote access to his computer. The suspect then informed the victim that a five-year protection service needed to be purchased to avoid compromise of financial data, for which a sum of €629 was to be paid by credit card. Trusting the claim, and fearing for the safety of his bank accounts, the victim agreed to the payment. He received an email from orders@quickpaylink.com, containing a payment link via a Redsys online interface hosted on the domain of 24 GLOBAL IT, which the victim unknowingly used to make the payment. The corresponding bank statement confirms a transaction labelled "PAIEMENT CB 24 GLOBAL IT SO (ESPAGNE)". Subsequently, the victim received an email from dse@eumail.docusign.net titled "Signature request containing 24GLOBAL_FR, order no. 1403748", which prompted him to digitally sign a document via DocuSign. He later received a tax invoice from a company named INTERNET PROTECTION GLOBALE for a service labelled "Premium security solution installation", a name unfamiliar to the victim, and with no corporate address, no SIRET number, and no reference to Microsoft. On review of the documents and realising that the payment had gone to an unknown Spanish company and not Microsoft, the victim understood that he had been misled and defrauded by the suspect under false pretenses of providing legitimate Microsoft support.

Victim #8

Source informed that on 15th December 2020, while browsing the internet, a fake interface resembling Microsoft's official page suddenly appeared on the computer screen of [REDACTED], 22 rue des Brayers, 91170. The screen displayed a warning that the computer had been blocked and instructed not to restart the system, claiming that doing so would result in data loss. A telephone number, 0970469197, was provided for assistance. On calling the number, the victim was connected to a person who identified himself as a Microsoft engineer. The suspect then took remote control of the computer, claiming to perform a cleaning process, and demanded a payment of €350 for installing antivirus software. Trusting the individual, the victim almost proceeded with the payment but later realized that the number did not belong to Microsoft's official support. He immediately blocked his credit card and took his computer to a specialist, who confirmed that spyware had been installed on the system during the remote session.

Victim #9

Source informed that on 19th December 2024, while Mariame Doridot, resident of Toulouse, France, was searching online for the Doctolib website to book a medical appointment, she inadvertently clicked on a suspicious link that did not resemble the usual site. Immediately, a pop-up window appeared on her screen, displaying Microsoft logos and emitting loud, alarming noises. The window claimed that her computer was at risk and instructed her to urgently call the phone number 0970187890 for assistance. Upon calling, she was answered by a woman who introduced herself as a representative of Microsoft Services. The woman stated that a technician would need to take remote control of the computer to clean it. After obtaining remote access through codes entered by the victim, the suspect informed her that the system could still be repaired, but a fee of €130 would be charged for the service. The victim was warned not to turn off or restart the computer, otherwise irreversible damage could occur. Believing the situation to be genuine, she proceeded with the payment using her credit card via an online platform. However, during the transaction, she noticed that the payment was being made not to Microsoft, but to a Swiss company named Alaska Solutions Y Jaun. When she questioned this, the woman suspect explained that it was a Microsoft subcontractor handling such issues. Later, suspecting fraud, the victim blocked her credit card, but the amount had already been debited and could not be recovered.

Victim #10

Source informed that on 13th November 2024, while Mr. Chaupin, resident of Bully-lez-Mirail, France, was browsing the internet using the Firefox browser, an advertisement banner appeared at the bottom of the screen. In an attempt to close it, he accidentally clicked on the ad, which triggered a pop-up window that froze his computer and displayed a message claiming the system was blocked. The message instructed him to contact Microsoft technical support at the phone number 09.72.16.48.09. Upon calling the number, he was answered by a woman who introduced herself as being from a company called ALASKA SOLUTION. Without questioning the connection between this company and Microsoft, the victim proceeded to follow her instructions. The suspect claimed that his computer was infected and took remote control of the system under the pretext of cleaning it. She demanded a payment of €385 by bank transfer for a two-year subscription to the supposed technical support service. The victim was provided with the following bank details: Beneficiary name - ALASKASOLUTION Y.JAUN; Account No. - 00761648632882001; Bank - AARGAUISCHE KANTONALBANK; IBAN - CH3000761648632882001; BIC - KBAGCH22XXX. An invoice from ALASKA SOLUTION was later received. A technician remained connected and operated on the victim's computer for approximately two to three hours. Fortunately, the bank later rejected the transfer. Subsequently, Mr. Chaupin received a call from a Spanish number inquiring about his satisfaction with the service. Around this time, his mobile phone began receiving a flood of unwanted advertisements. He traced the issue to an application that had started downloading and managed to stop it. As a precaution, he changed his mobile number and all account passwords, took support from Bitdefender antivirus, and cancelled his credit card.

Victim #11

Source informed that on 9th October 2024, while Mr. Motte, resident of Villeneuve-la-Duché, France, was setting up his new computer, he received an email and, upon clicking a link, a loud siren suddenly blared from his device along with a warning message instructing him to immediately call Microsoft technical support at the number +33 972 164 809. The call was answered by a woman suspect who claimed to represent a company named SHORTCUTSWAYS Y JAUN, identifying it as a Microsoft subcontractor. She informed Mr. Motte that his computer was infected with viruses and insisted on taking remote control of the device to clean it. She further stated that a one-year support contract was necessary and demanded a payment of €509 via credit card for the service. The victim agreed and subsequently received an email from no-reply@quickpaylink.com with the subject "Pay order no148815," directing him to a Redsys payment interface operated by NEXO SECURE SHOP. The corresponding debit of €509 was later confirmed in his bank statement under the label "NEXO SECURE SHOP MADRID". Following this, Mr. Motte was sent a contract for signature via dse@eumail.docusign.net and then received a final invoice and copy of the signed contract from adobesign@adobesign.com, issued in the name of the Swiss

company SHORTCUTSWAY Y JAUN. The next day, he received a follow-up call confirming his registration and support membership, and on 10th October 2024, an email from contact@s360.me with the subject "Réparation PC (Code Confirmation : MB59650)" provided a technical intervention report, followed by another email on 11th October from the same address titled "Customer code," signed "Service administratif et logistique ALASKA." These facts indicate a coordinated fraud wherein the suspect used deception, fake affiliations, and digital contracts to mislead the victim and extract money under the guise of technical support.

Victim #12

Source informed that on 6th August 2024, while [REDACTED] was browsing the internet, a pop-up window suddenly appeared on his computer screen bearing the Microsoft name and logos, claiming that the system was infected with a virus and had been blocked. The message instructed him to call a specific telephone number for assistance. Upon calling, a woman answered, claiming to be a technician, and proceeded to take remote control of his computer. She informed Mr. Vetry that the computer could not be unblocked unless he subscribed to a one-year protection plan, for which he would have to pay €369. Trusting the caller, Mr. Vetry paid the amount via credit card through an online interface. A corresponding debit appeared in his bank account on 7th August 2024 under the label "NS ESPAN SHOP EUR". After about two hours, the so-called technician informed him that the system was now operational. Subsequently, Mr. Vetry received a PDF file containing a technical activity report and a general services contract issued in the name of NEXO SECURE SHOP SL. On noticing that the company name in the documents did not correspond to Microsoft, he became suspicious and, upon conducting a search online, realized that he had likely been the victim of a scam. The suspect had clearly used deceptive means to impersonate Microsoft support, gain unauthorized access to the victim's system, and obtain payment under false pretences.

Victim #13

Source informed that on 30th July 2024, [REDACTED], while using her computer, found a forceful and alarming message suddenly appearing on the screen, displaying Microsoft logos and claiming that her system was compromised. The message instructed her not to turn off the computer under the threat of data loss and provided a phone number, +33 972 164 809, for so-called Microsoft technical support. Upon calling, the suspect offered to install antivirus software and later claimed the system had been repaired, demanding a payment of €354 for the service. The payment was made by Ms. Pot using her VISA card through a digital payment interface. Later, her bank statement revealed that the transaction had been credited to a Spanish company named CB NERO MARKETING SL. On 2nd August 2024, Ms. Pot received an email containing an invoice and a service contract from a company named SHORTCUTSWAY Y JAUN, though at no point during the interaction was this company mentioned—she was led to believe throughout that she was dealing with official Microsoft support. Under the pressure of the situation, she signed the contract without carefully reviewing it. After realizing the deception, she contacted her bank to block her card, but the amount had already been debited and the bank could not trace the destination account. Ms. Pot later received two follow-up calls from the suspect, seeking feedback and claiming antivirus installation, though she observed no new software or suspicious activity on her MacOS 10.13.6 system. Since then, she has had no further contact from the suspect.

Victim #14

Source informed that on 30th July 2024, [REDACTED], was working on the computer and a pop-up window suddenly appeared, accompanied by loud and alarming noises. The window displayed Microsoft's name and logos and directed her to call the number 0970383388 for assistance in cleaning her supposedly infected computer. Upon calling the number, she was answered by a woman who, although not clearly stating she was from Microsoft, spoke reassuringly and gained the victim's trust. The suspect then remotely accessed Ms. Reith's computer and informed her that the system could be cleaned for a payment of €369. Although initially hesitant and intending to consult her husband, the same alarming window reappeared with the same noises, pressuring her into proceeding with the payment via credit card through an online platform. The payment was later identified as being received by the Spanish company 24 Global IT Solutions SL. After the transaction, the suspect continued to control the computer and provided another contact number, 0184130966, for future queries. When Ms. Reith called this number, the person confirmed that the system had been cleaned. Subsequently, she received a technical activity report and a general service contract from 24 Global IT Solutions SL, which she signed via Docusign without reviewing the contents, believing she was dealing with official Microsoft support.

Victim #15

Source informed that on 4th June 2024, when [REDACTED], was browsing a news website, her computer screen suddenly went black and an alert appeared accompanied by a loud alarm, displaying a phone number 01 86 51 01 16 and a warning message claiming her computer had been hacked. Believing the message to be legitimate, she called the number and spoke to a woman who identified herself as a representative of "Windows Support." The suspect then remotely accessed Ms. Senatore-Salies's computer, navigated through various files, and claimed that hackers were actively stealing her banking information, urging her to act immediately. Due to time constraints—being a remote language teacher with an upcoming class—Ms. Senatore-Salies, under stress and pressure, agreed to purchase a one-year assistance package for €298 to regain use of her computer. The payment was made online, despite initial suspicions due to the involvement of a Spanish phone number and a Madrid-based payment recipient. The suspect explained that Windows Assistance operated globally with its financial office in Spain. Following the transaction, she received a receipt from a Spanish company named Real Tech Designs, and the software "Webroot SecureAnywhere" appeared on her system. A follow-up call came from number 09 77 21 86 60, and her computer was reportedly restored. Later, Ms. Senatore-Salies consulted an independent technician who confirmed that she had been the victim of a scam. She then blocked her credit card and filed a report of credit card fraud with her bank, Crédit Agricole Sud Méditerranée. Subsequently, she received various documents, including a technical activity report, a general service contract with Real Tech Designs SL, and a Docusign confirmation showing Zest Consulting SL's involvement in the digital signature process.

Victim #16

Source informed that on 17th November 2023, Mr. [REDACTED] found while using the Internet, a pop-up window appeared on his computer screen warning that the system was blocked and infected with viruses, and instructing him to call the phone number 01 84 13 09 66 for assistance. Believing the alert to be genuine and originating from Microsoft, Mr. Charvet called the number and was connected to a person identifying herself as Céline Rossey, who claimed to be a subcontractor for both Microsoft and Apple. She then took remote control of his computer and, after approximately 30 minutes of access, informed him that a payment of €259 was required to resolve the issue. The payment was made by Mr. Charvet via credit card through an online platform, and as seen on his bank statement, the recipient was Absolute Software, based in Madrid—though this company had not been mentioned at any point during the initial interaction. Additionally, Mr. Charvet later received an invoice from a company named Internet Protection Globale, which was also not referenced during the call.

Victim #17

Source informed that on 30th October 2023, Mr. [REDACTED] was using his computer and a pop-up message appeared warning of a security threat, citing "Windows Defender - Security Warning - Threat detected. Trojan Spyware - Windows has been blocked due to suspicious activity," and instructing him to contact technical support at the number 09-69-18-62-32. The message included the Microsoft name and logos, leading Mr. Detwiler to believe it was a legitimate alert from Microsoft. Upon calling the number, he spoke to an individual who claimed to be a Microsoft technical support employee. The caller then obtained remote access to Mr. Detwiler's computer and, after approximately an hour, redirected him to another entity called Firstidea Solutions, allegedly a Microsoft subcontractor, for further intervention lasting an additional 90 minutes. Before the intervention, Mr. Detwiler was asked to pay €259 by credit card, which was processed under the description "DU 301023 FIRSTIDEA SOLUT ESP," indicating a recipient located in Spain. Subsequently, he received an invoice from a company called Internet Protection Globale, including a 6-month maintenance contract that had not been mentioned during the interaction. Mr. Detwiler later realized he had been misled and was likely the victim of fraudulent activity.

Victim #18

Source informed that on 29th September 2023, [REDACTED] was browsing the Internet and suddenly a pop-up window appeared on her computer, supposedly from Microsoft, warning that her system was infected with a Trojan horse and instructing her to call a provided phone number. Believing the alert to be legitimate, she contacted the number and was answered by an individual claiming to represent Microsoft technical support. The suspect then remotely accessed her computer and advised her that the system could be cleaned upon payment of €149, which she agreed to pay by credit card. Shortly thereafter, she received an email from payment@securesdocument.eu, issued by a company named NEXO SECURE SHOP, with a payment link via the Redsys online platform. A bank transaction confirmed the payment to NEXO SECURE SHOP S. Subsequently, she received multiple emails from info@secure-payments.eu, including one requesting her electronic signature on a service agreement and another with a signed copy of a general service contract and technical activity report issued by NEXO SECURE SHOP SL. At no point was Microsoft officially involved, and upon noticing discrepancies between the presented identities and the contractual entity, Mrs. Wiatrowski conducted an online search and realized she had likely been deceived.

According to the source, in respect of abovementioned offences, the operation is largely managed through call centers situated in Delhi, India, while the financial dealings are handled by companies based in Spain and France, which are ultimately controlled by individuals operating out of Delhi. As detailed above, the suspects impersonate legitimate tech support agents to gain unauthorized remote access to victims' computers, charging them for services that are either unnecessary or harmful. The source has also provided specific details of a malicious URL linked to the operation, preserved at <https://urlscan.io/result/72d64833-af4a-4b6c-adbe-be842e78253e/>. The payment page associated with this URL identifies the fraudulent company name as *Absolute Software*. The group frequently employs a range of deceptive brand names, often with minor variations, to carry out their schemes. These include: TechZone Solutions, First Idea Solutions, Depan247, World Live Solutions, Right Network Fix, Nexo Secure Shop, Live Network Help, Premium Network Fix, Internet Digital Protection, QN Help, All Net Solutions, Right Net Support, WLS Europe, Global Webtech, Absolute Softwares, Wowser E Services, 24Global IT Solutions, Real Tech Designs, Zest Technology, Internet Protection Globale, and Internet Solution Internationale.

A list of key digital identifiers—comprising suspect domain names, email addresses, and contact numbers—has been gathered from source and is annexed as **Annexure-A**.

One of the central figures in this network is **Pranav Khanna**, whose residential address in India at B-251, First Floor, Priyadarshani Vihar, Next to LPS School, Delhi - 110092. He is suspected of orchestrating payment routing through the Spanish platform *Redsys.es* to a series of front companies under his control. These payment links, often generated via websites listed in Annexure-A (including the domain *moneyeu.com*), are used to collect money from victims under false pretences. Notably, Pranav Khanna identifies himself as the Founder and CEO of *Money EU* (*moneyeu.com*) on his LinkedIn profile (<https://www.linkedin.com/in/pranav-khanna-861397190/>). He is operating email IDs: pranav.khanna@live.com, zestpay4@outlook.com, pk@zest.global. The network of shell entities controlled by Pranav Khanna, in collaboration with his associate **Arjita Chopra**, forms the backbone of the transnational financial infrastructure supporting the fraud operation. The entities controlled by Pranav Khanna, along with his accomplice Arjita Chopra, is detailed below:

Entity	Name	Relation
ZEST GLOBAL FINANCIAL GROUP SA (DEFUNCT)	Khanna Pranav	Adm. Mancom.
ZEST CONSULTANCY SL	Khanna Pranav	Sole Administration
ZESEIS SPAIN SA	Khanna Pranav	Adm. Mancom.
DYNAMIC IT SL	Khanna Pranav	Sole Administration

APRA FASHION SL	Khanna Pranav	Adm. Solid.
ZEST CONSULTANCY SL	Chopra Arjita	Sole Administration
ZESEIS SPAIN SA	Chopra Arjita	Sole Administration
CLICK AURUM SOLUTIONS SL	Chopra Arjita	Sole Administration
ZESEIS SPAIN SA	Chopra Arjita	Apod. Solid.
ALIUS SECURE SHOP SL	Chopra Arjita	Liquidator
ALIUS SECURE SHOP SL	Chopra Arjita	Sole Administration
DYNAMIC IT SL	Chopra Arjita	Sole Partner
GLOBAL WEBTECH SL	Chopra Arjita	Sole Administration
ABSOLUTE SOFTWARES SL	Chopra Arjita	Sole Administration
FIRSTIDEA SOLUTIONS SL	Chopra Arjita	Sole Administration
MACMAKERS IT SERVICES SL	Pranav Khanna	Sole Administration
REAL TECH DESIGNS SL	Pranav Khanna	Sole Partner
WORLD LIVE SOLUTIONS SL	Pranav Khanna	Sole Administration
ALIUS SECURE SHOP SL	Chopra Arjita	Liquidator

Arjita Chopra is associated as a director of some of the entities controlled by Pranav Khanna. She is user of email : arjita.chopra28@gmail.com

As per source **Arjun Prakash** is another key individual involved in the fraudulent scheme. The domain names firstidea.us and worldlivesolutions.com, used in various cybercrimes, were registered by Arjun Prakash initially. These domains were subsequently registered by World Live Solutions SL, which is also the registrant organization for multiple other domain names used in various cybercrimes. Most of these domain names are hosted on the same IP address (79.125.18.245). Arjun Prakash has also served as director and associate of multiple companies registered in USA, which have been used in commission of tech support scams. Important ones are First Idea Solutions Inc., Techzone Solutions Inc, Marvello Technologies LLC and Webex Solutions LLC. As per source Arjun Prakash resides at 316, Sector 92, Noida, Gautam Buddha Nagar, Uttar Pradesh, 201301 and uses mobile Phone No. 8506081961. He uses email IDs: arjun@firstidea.us, arjun.pk@gmail.com, arjunprakash11@gmail.com, arjun.prakash@aol.com, arjunprakash@outlook.com in commission of cybercrimes and for accessing various infrastructures on platforms of Microsoft. Source has further informed about an operational call centre, involved in tech support scam, and operated by Arjun Prakash. The call centre is located at SDF NO. C-06 A, NSEZ, Noida Dadri Road, Phase-II, Noida, Gautam Buddha Nagar, Uttar Pradesh, India, 201305. The call centre uses the Business Name and sign boards of "**FirstIdea**".

As per source **Nishant Walia** is an important accomplice of Arjun Prakash. Both were also the directors of Firstidea Solutions Private Limited (Registered in India) a firm engaged in cybercrimes. Nishant Walia has been historically connected with multiple scam call center groups such as Divine Techno or Divine Technical, First Idea Solutions, Click Aurum and Marvello Group. These entities have been involved in multiple tech support scams. He uses emails: nishantwalia210590@gmail.com, nishant.walia@gmail.com, walianishant78@gmail.com, walia.nishant21@gmail.com and phone numbers: 918512805681, 919871600707, 919643809216, 917701917842. As per source Nishant Walia resides at Niho Scottish Garden 02 Flat 201, 2nd Floor, Ahinsa Khand II, Ghaziabad, Uttar Pradesh 201301, India. Further, Nishant Walia is Director of Click Aurum Group, a registered company located at : 101 Plot No 22 Shakti Khand-2, Indrapuram , Ghaziabad, Uttar Pradesh, India - 201014, involved in tech support scam. Walia is also director in FirstIdea Solutions Pvt. Ltd. located at T05-0001, Grd Floor, Tower 5, Paras Tiera Noida Sector 137, Noida, Uttar Pradesh, India - 201301 and involved in tech support scams.

As per source, following IP addresses have been used by abovementioned suspects, and their accomplices for the period mentioned:

IP Address	Duration of use
103.59.210.38	19-12-2024 to 16-04-2025
136.232.151.2	25-10-2024 to 21-04-2025
180.151.7.114	02-12-2024 to 13-12-2024

The information discloses commission of cognizable offence Under Sections 61(2), 318(4), 319(2), 308 BNS, Sections 120B, 420, 419, 384 IPC and Section 75 r/w 66C, 66D, 66 r/w 43 IT Act 2000 by Pranav Khanna, Nishant Walia, Arjun Prakash, Arjita Chopra and Unknown Person (s). Accordingly, a regular case is being registered and assigned to Sh. Animesh Kumar, Inspector, CBI, EO-III for investigation.

13. **Action taken:** Since the above information reveals commission of offence(s) u/s as mentioned at Item No.2:

- (1) Registered the case and took up the investigation: Yes
OR
(2) Directed

Name of IO:

Animesh Kumar

Rank:

INSPECTOR (EO-III Delhi)

No:

118699

to take the investigation

OR

(3) Refused investigation due to:

OR

(4) Transferred To PS:

District:

on point of jurisdiction.

Attached documents:
